

A Total Revolution in Just a Half Turn!

Draining water from a Donaldson P558000 Fuel Filter Water Separator (FFWS) is so easy – you'll be more likely to perform your recommended drain procedures!

Check out the Donaldson P558000 Twist&Drain™ FFWS

Features:

- Large valve handle – designed with the driver in mind
- 180° turn from click to click – it's quick and easy to use
- Innovative design

Benefits:

- Fast water elimination with free-flowing drain
- Water evacuates in a quick, steady stream – not a slow drip
- Meets or exceeds original equipment manufacturers' specifications

TRUCKING

CONSTRUCTION

One challenge facing the truck operator is the daily task of draining the water from the fuel filter. With just a twist, the revolutionary Donaldson Twist&Drain valve turns the messy and complicated task of draining water from a fuel filter into the easy and efficient process it should be.

Draining existing styles of fuel filter water separators can not only be messy, but can take more time to drain at the end of a long day. This new design will make a daily routine quick and simple, and will reduce fuel system maintenance costs.
