

# T.R.A.P. Moisture Vapor with Donaldson Breathers for Hydraulic Reservoirs

Water has a way of sneaking into hydraulic circuits and that means trouble. No water slips by the Donaldson Thermally Reactive Advanced Protection (T.R.A.P.) Breather.

## Features and Benefits

- Minimize water in your system - T.R.A.P. breather strips moisture from the incoming air, allowing only dry air to enter the hydraulic circuits
- Maximize system uptime - Patented T.R.A.P. media regenerates its water holding capacity for longer service life
- Hydraulic reservoir can breathe - The T.R.A.P. doesn't restrict air flow

**MINING****CONSTRUCTION****INNOVATION**

## New Fast-acting Breather Eliminates Moisture from Hydraulic Reservoirs

- Extended service life (exhales moisture and refreshes its holding capacity on each cycle)
- Reacts instantly to conditions in the hydraulic circuit, creating a moisture barrier without impeding airflow
- Reduced maintenance costs
- Thermally reactive barrier that removes moisture at relative humidity levels as low as 15%
- Superior moisture blocking and particulate filtration down to  $3\mu$  at 97%
- Will not freeze in winter
